# quickcab

An easy to use taxi booking app for fixed locations.

1. Basic booking

For the simplest booking press the book button and a vehicle will be dispatched to your location.
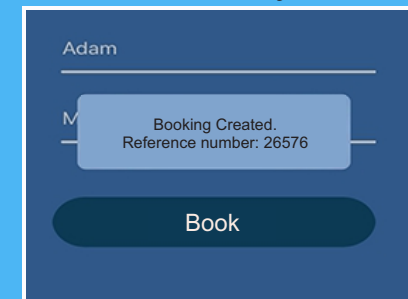

2. Optional Information

The additional information helps to identify the passenger in the case of multiple bookings and to dispatch the most appropriate vehicle.

1) Enter a name

2) Select the vehicle type
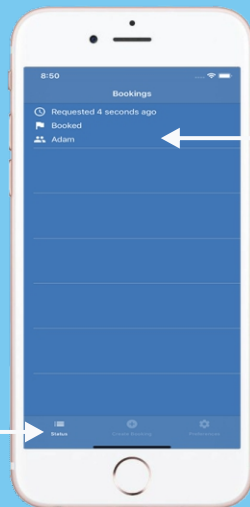

3. Booking Confirmation

The booking has now been created and a vehicle will be on the way.

The reference number will be displayed for a short time before the screen will reset for a new booking.
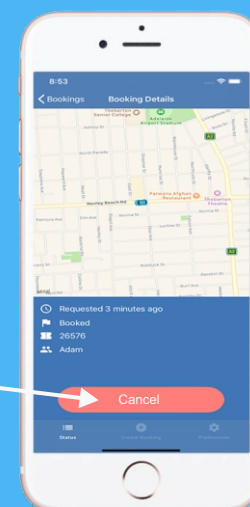

4. Recent Jobs

Selecting the status button will bring up a list of all of the most recent jobs.

5. Booking Details

Select the individual booking to view the booking details.

If a taxi is on the way the map will show where the vehicle is located along with an option to cancel the booking.

6. Cancel

To cancel a booking, select cancel on the booking details page.
